

Autonomous Recycling Logistics

Armağan Arslan

Founder
armagan@joeppli.ch

PROBLEM

Circular Economy has a weak link

Swiss recycling rests on **one motivated** person in the household.

Effort

Elderly, car-free, time-poor households left out.

~500 m

Average distance to
Sammelstellen

Waste

Illegal littering & mistakes are a hidden tax cost

40%

Trash could be
recycled

No Data

ERZ had to hand-sort 832 bags to learn this.

Zero

household-level
recycling data

SOLUTION

Bring the collection point to the household.

Electric mini-truck comes to the door

Narrower than a Microlino.

No fixed infrastructure needed

No new collection points to build or maintain.

Scales without headcount

Drives unit economics.

PRODUCT

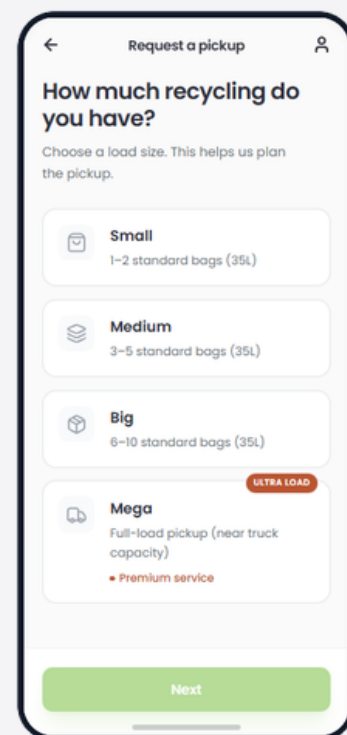

How it works

Residents request, vehicles collect, city gets the data oversight.

Resident app

Request a doorstep pickup in two taps.

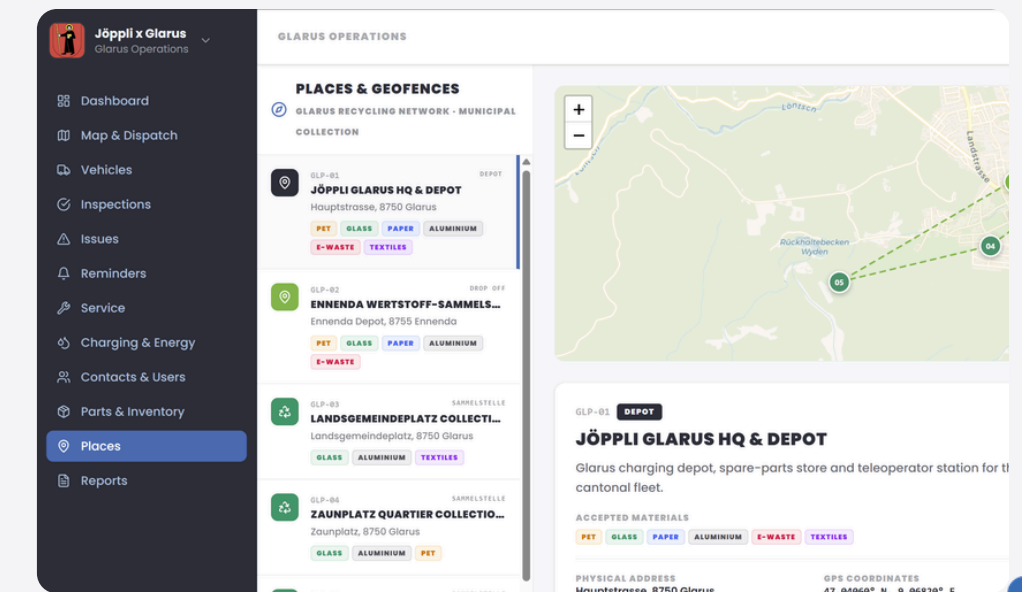

Autonomous fleet

Electric vehicles, dispatched on demand

City console

Every pickup logged by type, weight & location

The regulatory window.

Swiss OAD in force since 2025 makes driverless operations possible.

Regulatory Green Light (2025)

The new Swiss Ordinance on **Automated Driving** allows driverless operation

Vertical AV is the Survivor

Narrow operational domain is the current market demand.
e.g. Shuttle bus, Package delivery

BAFU (FOEN) Mandates

Reuse and recycling prioritised over incineration with tighter targets

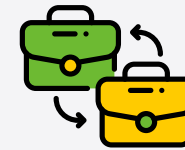

Joint operation – Robot As a Service (RaaS)

Tech operation by Jöppli and management by the municipalities

B2G

Per-district monthly RaaS contracts

B2B

Branded Fleets & Other Waste Verticals

CHF 1.5B Switzerland.

Switzerland produces about six million tonnes of waste per year.

CHF 30B

EU municipal refuse & recycling collection-services
spend, per year.

CHF 1.5B
Swiss Market

CHF 6M
ARR

1 vehicle = **0.5** km²
urban zone

50+ vehicles
operational by **2030**

ERZ › Switzerland › EU

Phase 1: Pilot

2027

Pilot in Zürich

Pre-Seed CHF 0.8–1M.

Phase 2: Multi-city

3–5 city, 5–15 vehicles.

In-house fleet management
& autonomy tech.

Series A CHF 6–8M.

Phase 3: EU

2030+ EU entry

50+ vehicles.

ARR CHF 5–15M.

Exit 2032–35.

What we are looking for.

1 Network

Introductions to municipalities, business partners, and circular-economy actors.

2 Feedback

Three minutes after this pitch.
